

Nuclear Medicine Operational Go-Live support

Implement working procedures and quality programs Support during the start-up phase of a Nuclear Medicine Centre

The definition and implementation of working procedures and quality programs in Nuclear Medicine is crucial for obtaining a high quality and safe exam or treatment.

Implement working procedures and Quality programs for the start-up phase of a new Nuclear Medicine Center.

Our team will help you to start the operation in your Nuclear Medicine Center, regardless the type of equipment (Gamma-Camera or PET/CT or PET/MRI) or the brand you choose - including Philips®, GE® or Siemens® -, by defining working procedures, creating Service materials, writing down protocols, implementing workflows, methods and Quality Assurance programs according to best international practices.

Mercurius Health will help you optimize and make the best use of the newest technologies in your practice.

We have an expert team, trained in all major equipments, that will help your team from the simplest exam to the most complicated one or to a treatment situation.

Hands-on training during the start-up phase of a new Nuclear Medicine Centre.

On-the-job training to the local team during the start-up phase of your Centre, providing reliable, more responsive and security to the performed activities.

Side by side with local team Mercurius Health will perform daily activity, for each area of work – Clinical, Physics, Technical – according to your needs. Local team will be learning and acquiring confidence in each performed activity.

Operational Go-Live support to your Nuclear Medicine Centre - What does it include?

- ✓ Support to the definition of working procedures for each exam type or treatment technique;
- ✓ Assistance in the preparation of forms for quality assurance (QA);
- ✓ Implementation of the reference Quality Assurance for special situations;
- ✓ Training (hands-on) for all members of the clinical team to improve quality and workflow efficiency;
- ✓ Knowledge transfer at your center location;
- ✓ Remote exams reports and physician / physicist consultation services, whenever you need.

Operational Support – benefits

- ✓ Hands-on training validates your staff's new core competencies;
- ✓ Optimizes the clinical application of technology;

- ✓ Time savings arising from experience and process optimization;
- ✓ Accelerates integration of new and advanced exams or treatments modalities;
- ✓ Enables the Centre to deal with complex cases.

Frequently Asked Questions

What information does Mercurius Health need prior to the execution of the job?

Mercurius Health needs to know what measurement equipment, Gamma-Camera and PET does the client has besides the vendor and models identification.

We also need to know which type of exams and treatment techniques you are intending to use.

To whom will be given the support?

It depends on your specific needs. Mercurius Health activity is focused on physicians, physicists and technicians.

How long does it take a full start-up program?

It depends on the size of local team, on the background of the team, on how many types of exams and treatment techniques are being implemented. Normally we recommend not less than a six month period to consolidate local team knowledge and practice experience but it depends on the extend of the needs.

Where will be given the training?

It will take place at your Centre location, using your own resources.

After Mercurius Health leaves how can we clarify some doubts, during the exam / treatment process itself?

Mercurius Health can offer real-time consultant services and give some practical recommendations.

Does Mercurius Health have experience with my specific equipment model?

Mercurius Health team is proficient in all of the following major equipment vendors:

Philips, GE and Siemens

What material is handled to me?

At the end of the service a CD is given to the costumer, including all written processes and protocols, a general report describing the entire process and final results.

How can I contact you?
