

Nuclear Medicine Training Program

Comprehensive Nuclear Medicine Training Programs

Nuclear Medicine Personalized Training Program at a Leading Centre

Comprehensive Nuclear Medicine Training Programs

Our team will help you to accelerate the implementation of new exams, regardless the type of equipment (Gamma-Camera or PET/CT) or the brand you choose - including Philips®, GE® or Siemens® - as well as to optimize and make the best use of the advanced technologies at your Centre.

Mercurius Health has an expert team, trained in all major equipments that will help your team from the simplest exam to the most complicated one or to a new treatment situation.

Mercurius Health can support you on a standard radiopharmacy management, but also on the introduction of new radiopharmaceuticals. Our expertise covers also HIS/RIS and PACS management.

What does Nuclear Medicine Training Program includes?

- ✓ Covers topics relevant to your practice
- ✓ Provides training (hands-on) for all members of the clinical team to improve quality and workflow efficiency
- ✓ Includes training on clinical processes/ cases, as well as in the planning and administration of exams and treatments

- ✓ Learning side by side, with the local team - learning through the example
- ✓ Radiation protection and safety principles
- ✓ Radiopharmacy manipulation
- ✓ Training on radiopharmaceutical injection and intravenous puncture techniques
- ✓ Help local team to improve exam performance and reporting for each type
- ✓ Support on image processing, quantification and reconstruction
- ✓ Support on waste management procedures
- ✓ Remote exams reports and physician / physicist consultation services, whenever you need

Nuclear Medicine Personalized Training Program at a Leading Centre

According to your equipments models, Mercurius Health will design a Training Program including a pre-defined period at a Leading Centre, learning the best practices in place. This training can be complemented by hands-on training at your Centre location.

Clinical training – benefits

- ✓ Hands-on training validates your staff's new core competencies;
- ✓ Optimizes the clinical application of technology;
- ✓ Time savings arising from experience and process optimization;
- ✓ Ensures that radiation is well managed, along the all process. From the arriving of the generator, to radiopharmacy manipulation, patient injection until the waste handling;
- ✓ Accelerates integration of new exams and treatments modalities;
- ✓ Enables the Centre to deal with complex cases.

Frequently Asked Questions

How long does it take the training?

It depends on the size of local team, on the background of the team, on how many types of exams and treatment techniques are being implemented. Normally we recommend not less than a six month period to consolidate local team knowledge and practice experience but it depends on the extend of the needs.

To who will be given the training?

It depends on your specific needs. Mercurius Health activity is focused on physicians, physicists and technicians.

Where will be given the training?

It will take place at your center location, using your own resources.

Personalized trainings programs also includes a workout at a Leading Centre.

How is the training plan prepared?

We will define a training package that will be tailored and specific to each process step, according to local team needs.

After Mercurius Health leaves how can we clarify some doubts, during the treatment process itself?

Mercurius Health can offer real-time consultant services and give some practical recommendations, even in the most difficult or unusual cases.

Does Mercurius Health have experience with my specific equipment model?

Mercurius Health team is proficient in all of the following major equipment vendors:

Philips, GE and Siemens
