

Radiotherapy Training Program

Comprehensive Radiotherapy Training Programs

Radiotherapy Personalized Training Program at a Leading Centre

During the past decade, the leap in radiotherapy technology has been overwhelming.

Cancer centers strive to accelerate and optimize the implementation of advanced technologies to ensure that patients are treated safely, efficiently and effectively.

As treatment equipments become more sophisticated and more tools become available to improve accuracy, Physicians, Physicists and Dosimetrists need sources of concise information, as well as training on the application of these new techniques.

Comprehensive Radiotherapy Training Programs

Our team will help you to accelerate the adoption of advanced techniques, regardless of the brand you choose - including Varian®, Elekta® or Siemens® - as well as to optimize and make the best use of the advanced technologies at your Centre.

Mercurius Health has an expert team in all advanced technologies trained in all major radiation therapy technologies – including IMRT, IGRT, RapidArc, VMAT or SRS.

What does Radiotherapy Training Program includes?

- ✓ Covers topics relevant to your practice

- ✓ Provides training (hands-on) for all members of the clinical team to improve quality and workflow efficiency
- ✓ Includes training on clinical processes/cases, as well as in the planning and administration of the treatment
- ✓ Learning side by side, with the local team - learning through the example
- ✓ Help local team to improve treatment planning for each treatment technique
- ✓ Offer remote treatment plans ,and physician/physicist/dosimetrist consultation services

Radiotherapy Personalized Training Program at a Leading Centre

According to your equipments models and TPS, Mercurius Health will design a Training Program including a pre-defined period at a Leading Centre, learning the best practices in place. This training can be complemented by hands-on training at your Centre location.

Clinical training – benefits

- ✓ Hands-on training validates your staff's new core competencies;
- ✓ Optimizes the clinical application of technology;

- ✓ Time savings arising from experience and process optimization;
- ✓ Accelerates integration of new and advanced treatment modalities;
- ✓ Enables the Centre to treat complex cases;
- ✓ Ensures that new and advanced treatment modalities are used for the most appropriate patient cases.

Frequently Asked Questions

How long does it take the training?

It depends on the size of local team, on the background of the team, on how many treatment techniques are being implemented. Normally we recommend not less than a six month period to consolidate local team knowledge and practice experience but it depends on the extend of the needs.

To who will be given the training?

It depends on your specific needs. Mercurius Health activity is focused on physicians, physicists, dosimetrists and also on the Unit area professionals.

Where will be given the training?

It will take place at your center location, using your own resources.

Personalized trainings programs also includes a workout at a Leading Centre.

How is the training plan prepared?

We will define a training package that will be tailored and specific to each process step, according to local team needs.

After Mercurius Health leaves how can we clarify some doubts, during the treatment process itself?

Mercurius Health can offer real-time consultant services and give some practical recommendations, even in the most difficult or unusual cases.

Does Mercurius Health have experience with my specific Linac or TPS model?

Mercurius Health team is proficient in all of the following major equipment vendors:

Varian, Elekta and Siemens.

PTW, SunNuclear and IBA.

Varian Eclipse, Elekta XiO and Monaco, BrainLab iPlan and BrainScan, Oncentra MasterPlan.
